Professional Summary

Software Engineer with experience in systems and distributed service architecture using JavaScript, Node.js, and NestJS. Working from requirements gathering to deployment: microservices, REST APIs, automations, and integrations implementing business rules.
Experience with PostgreSQL databases, queues, webhooks, and function calling, with code quality monitoring, observability, and continuous delivery following Scrum and Kanban agile methodologies. Also have extensive experience in the development of chatbots and intelligent virtual assistants using low-code, having designed and maintained production conversational journeys, aligning scope with clients and operations, and tracking post-delivery KPIs. Broad business acumen, consistently working directly with other departments focused on customer success.

Experience

AI Engineer Mid Level / Software Engineer Mid-Level

EXA Seguros — feb/2026 – sep/2026

• Development and maintenance of automations for an insurance platform using JavaScript, TypeScript, Node.js, NestJS, and TypeORM.
• Building APIs and microservices applying business rules in SQL, with robust authentication and authorization via JWT.
• Implementation of system and API integrations via webhooks and function calling for end-to-end task orchestration.
• Implementation of asynchronous flows for batch file processing and automated communications dispatch.
• Implementation of messaging and queue management with Redis to support asynchronous architecture.
• Monitoring CI/CD pipelines during pull request creation and tracking code quality in SonarQube.
• Service monitoring and observability with Grafana, continuous deployment via ArgoCD, and distributed workflow orchestration with Temporal.
• Scrum: refinement, planning, daily, and review ceremonies.

Senior Chatbot Developer
Macro Digital — Sep/2024 – Feb/2026

• Active involvement across the client lifecycle for Blip chatbots in production: discovery, flow, delivery, and support/maintenance.
• Low-Code.
• Conversational journey design, requirements gathering, and flow organization.
• REST API integrations using JavaScript and Node.js for customer service and inter-system data exchange.
• Tracking journey KPIs and handling production support/maintenance.
• Client training on the platform and business scope alignment, using Kanban and Scrum.

Mid-Level Chatbot Developer
White Wall — Mar/2024 – Sep/2024.

• Development and maintenance of chatbots on the Blip platform in production, using JavaScript, Node.js, and REST APIs.
• Low-Code.
• Incident management, flow adjustments, and customer service integrations.
• Requirements gathering with clients and application of NLP in conversational journey design.
• Version control with Git and GitHub, using Kanban and Scrum.

Chatbot Developer
Digitalbot — Mar/2023 – Nov/2023

• Work with JavaScript and Node.js in building Blip chatbots and API integrations.
• Low-Code.
• Training operations and management teams on the platform.
• Journey reports and dashboards for continuous improvement and maintenance.
• Participation and alignment with clients, UX, and QA during requirements gathering.

Chatbot Developer / Tech Lead
Chat2Desk (Brasil) — Apr/2021 – Dec/2022

• CRM technical support.
• Building virtual assistants on a low-code platform.
• Technical leadership: development schedule organization and bridging communication with other departments.
• Requirements gathering, flow design, and overseeing implementation and chatbot testing, using Kanban.

Education

MBA in Software Engineering – Universidade de São Paulo (USP) – May 2024 – Jan 2026

Postgraduate Specialization in Data Science and Artificial Intelligence – UNINTER – Apr 2021 – Dec 2022

Associate Degree in Systems Analysis and Development – Faculdades Integradas Simonsen – Jun 2015 – Jun 2018

Skills:

• JavaScript • TypeScript • Node.js • NestJS • TypeORM • Low Code • APIs REST • SQL • PostgreSQL • Chatbot • Assistentes Virtuais • Inteligência Artificial • Redis • JWT • Git • GitHub • SonarQube • Grafana • Argo • Temporal • Docker • Blip • PNL (Processamento de Linguagem Natural) • Scrum • Kanban
